## Professional Description

I specialize in front-end work with a focus on elevating User Experience (UX) and User Interface (UI) expertise. I enjoy creating great looking digital products, focusing on performance as well.

Skilled in JavaScript along with the utilization of several frameworks.

Additionally, I excel in crafting vector elements, wireframes and prototyping, ensuring a seamless integration of design and development for optimal user engagement.

## Knowledge

## Work Experience

2021 - Present

- **ParallelDevs Frontend Web Developer** • Full-time

I worked on several development projects, showcasing my proficiency in Drupal, WordPress, and other headless sites with frameworks like React, Gatsby, Astro, and others using CMS like Drupal or Contentfull consulted through GraphQL. My expertise extends to applying the Atomic Design Methodology by implementing the Emulsify framework to generate reusable frontend components for custom theming. Additionally, I worked on other site-building functionalities, including building custom modules, content types, views, blocks, SEO optimization, forms, and more.

Some of my achievements:

- Developments in limited times.
- Active participation in the Drupal community, and module maintenance.
- Joint development with people from different countries like USA, Canada, and Bangladesh.
- High performance in development as well as interface.
- Gave talks at the Drupal Camp Costa Rica 2022 and 2023.

2020 - 2021

- **Assistant hours at the Luis Ferrero Acosta Library of the UCR** • Part-time

I updated and managed the library's website and database, also managed the library's social networks, created posters and other graphic identity elements to promote academic activities or celebrate holidays, worked as part of a team to organize activities in the library.

2019

- **Assistant hours at Acción Social Department of the UCR** • Part-time

I worked as an assistant providing help and support in different socio-cultural activities that involved people from the community, and people in situations of poverty or social risk, I managed the office and organized several files to keep control and inventories.

2019

- **InterGameDev & Desing at Ingeniust** • Part-time

I worked in design and prototyping of menu interface for videogames developed with Unity.

## Hard Skills

Advanced knowledge in web development and mobile applications.

Great QA approval rate and accurate estimates for new projects.

Great QA approval rate and accurate estimates for new projects.

Experience using 3rd Party API integration in various development projects.

Advanced knowledge in Databases, Web Design and Interactive Applications.

Proficient knowledge of Linux operating systems with and without an interface.

Knowledge operating hosting systems and websites migrations.

Advanced skills in layout and prototyping with Figma.

Skills in creating multimedia elements of identity such as logos, banners, posters, covers, and infographics in Adobe Illustrator.

Proficient knowledge of manipulating video tracks with Adobe Premiere Pro.

## Educational Profile

2021 - In Progress

- **Bachelor's Degree emphasis on user experience**

Computer Science and Multimedia Technology in University of Costa Rica.

2018

- **Bachelor's Degree**

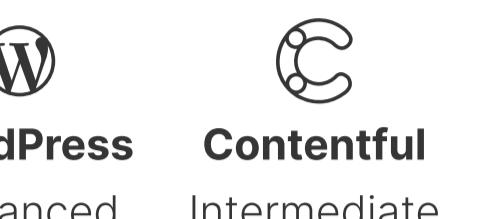

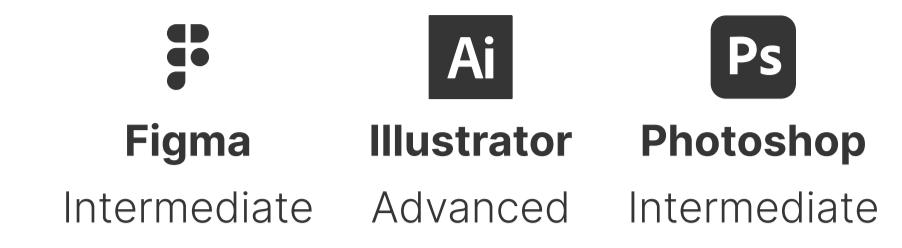

Computer Science and Multimedia Technology in University of Costa Rica.

2013

- **College Diploma**

Santa Fe Pacific High School.
